115-117 North First Street

TREE PATHOLOGISTS ARE IN CITY

Government Officials From Forestry Bureau in Washington Come to New Mexico to Investigate.

Dr. George G. Hedgecock and W. H. Long, pathologists from Washington, are here to investigate the girdle-toe and fungi attacking the trees of New Mexico forests. They will also work in Arizona.

Dr. Hedgecock said this morning: "We are here from the bureau of pathology in Washington to look into tree diseases in New Mexico and Arizona, and devise means for eradicating them. We are especially interested in mistletoe and other fungi which rot the wood. You know not only can a tree rot while living, but it can then be infected with a fungus which will cause it to rot after being sawed into timber. Heart rot will also be investigated."

Mr. Long will establish a permanent office here this winter, for the study and treatment of tree diseases, and conferences with the forest officials regarding the necessary treatments in trees on the forests.

Wool Dress Goods

For the next few days we will make special efforts to display the extensive line of Wool Dress Goods we show at the popular price of

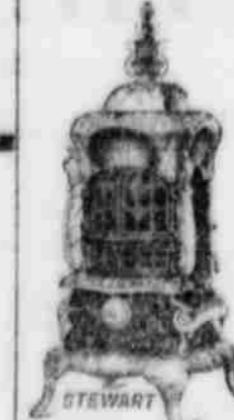

\$1.25 a Yard

We are doing this because we know it will prove in an effective and satisfactory way the popularity of and the exceptional advantages to be had in our Dress Goods Department—and it will prove in a satisfactory way the excellence of our Dress Goods. Furthermore, it will reveal to you as a dress goods buyer the real secret of this department's success—and give you a clearer idea of the large variety of shades, weaves and styles that have been represented all along in our "Dollar and a quarter" line of dress fabrics and suitings.

If you are of the opinion that nothing desirable can be had at this popular price, a pleasant surprise awaits you—see our east window for a few of the many more than ordinary numbers we are showing at this price.

\$1.25 a Yard

**FERGUSON &
COLLISTER**

M'Collom is a Scholar and a Gentleman; Will Make An Ideal Superintendent

J. B. McCollom, candidate on the Republican ticket for superintendent of schools in Bernalillo county, is not a politician. He has friends in all parties who believe in his honesty and efficiency in school management and who will support him and take his election because they place the interests of our public schools above party politics. Mr. McCollom is a scholar and a gentleman. He has been a school teacher and engaged in educational work of various kinds for many years.

Born in Amity, Pa., of Welsh and Scotch-Irish parentage, Mr. McCollom is forty-nine years old. Educated in the public schools, Amity and the state normal school of Pennsylvania, he taught for two years in training centers in that state. Upon graduation he was honored by the state board of education with a first teacher's certificate, enabling him to leave Pennsylvania. Mr. McCollom went to Iowa and spent eighteen years in that state in educational work. He was principal of schools at Grinnell, Iowa, county superintendent in Wright county, Iowa, town for two years, city superintendent at Clinton and North English. In 1895, because of the health of a member of his family, Mr. McCollom resigned at North English and came to Albuquerque, where September 1, 1895, Mr. McCollom has been principal of the Fourth ward school, the largest school in Albuquerque. When Mr. McCollom assumed charge of the Fourth ward, there were 250 pupils. There are now

450 pupils and fourteen teachers. Ten of the fourteen teachers are Albuquerque girls. In the last six years more than one half of the home girls employed as teachers in the Albuquerque city schools have been assigned to the Fourth ward and receiving their best experience in graded school work under Mr. McCollom's supervision. All have made good. Mr. McCollom modestly attributes their success to their own ability and the discretion of the board of education in selecting the best talent. The teachers, however, attribute much of their success to friends' interest and wise counsel of their principal.

Mr. McCollom's work is always characterized by absolute fairness and impartiality. The square deal and equal opportunity for every child entrusted to his care has won that confidence of parent, teacher and pupil which secures that cooperation of home and school so essential to the highest development of the public schools.

From time to time Mr. McCollom has visited the rural schools and studied educational conditions in Bernalillo county in preparing for institute work. For two years Mr. McCollom worked as an institute conductor in the Bernalillo county institutes and has a wide acquaintance with county teachers. Mr. McCollom owns a home permanently identified with the upbuilding of the city. All in all Mr. McCollom is an ideal man for the position of county school superintendent and will make a splendid record for himself in that office.

ROSWELL MEN BUY PERSIAN SHEEP FOR RANCH

Hundred Head of Pure Bred Animals Purchased From Buffalo Jones and Ranch for Breeding Established.

Roswell, N. M., Oct. 29.—Two men have entered the Persian sheepfold, and are the first in New Mexico, after Buffalo Jones, from whom the original stock was obtained, to start breeding of the imported strain of animals on an extensive scale.

The men are Henry Tarr and Emil Fratz and they have one hundred head of pure bred Persian sheep—twenty-five rams and seventy-five ewes—and will establish at their ranch in Lincoln county a breeding farm where they will raise pure breeds and also propagate cross breeds and the rams. The shipment of these sheep will be to Roswell and they are expected to reach here on the 26th or 27th of next month.

The Persian sheep are larger, smoother and of greater vitality than any of the other breeds of domestic sheep. They have been raised since time immemorial on the barren wastes of the Arabian deserts, and nature adapting herself to conditions has made of them an animal that can chafe a camel in going without water and bear in abstaining from food.

This may seem like an extravagance, but some time in the dim past another nature conceived the idea of providing these valuable animals with a storage reservoir upon which they could draw in case of necessity and depend upon the caudal appendage as the proper place for that reservoir.

In the ordinary herds of sheep the tail is considered as a useless appendage by the flock master and he proceeds to relieve lambs thereof on the first opportunity—not so with the Persian. His tail is his chief glory and his storehouse for sustenance in times of drought.

The Persian sheep have a longer and somewhat coarser fleece of wool than the Merino and their pelts, with the wool attached, are the far famed Persian rugs of commerce. Their most singular trait however, is the caudal reservoir above alluded to. During the season of the year when the feed is good they take on fat at a surprising rate and not only their bodies, but their tails which are never amputated get to be an immense gob of fat, weighing at times in an adult sheep as much as seventy pounds.

Fraud Possibilities.

"Suppose a pretty woman were to be consoling and were to offer a kiss for a kiss?"

"Well—"

"Should any lady of human beings be a man for wanting to be a partner?"

SUGAR THREE — FILLERS Ambiguous.

"Haven't you a great dislike for foreign phrases?"

"Yes, but my dislike for them is not pronounced."

Big Pay in Civil Service

The pay is good, the work congenial and promotion rapid in the U. S. Civil Service. If you are an American man or woman over 18 you are eligible for any government position if you pass the Civil Service Examination. To learn how you can qualify in your spare time, write for our free Civil Service booklet, M. C. Hooper, representative of International Correspondence Schools, Box 142, Albuquerque, N. M.

The Markets

GENERAL MARKET IS IRREGULAR WITH NO EXCITEMENT

U. P. and Amalgamated Copper Make Substantial Advances; C. P. Jumps; Wheat Weak in Chicago.

By Evening Herald A. P. Leased Wire

New York, Oct. 28.—There was little trace of the excitement of yesterday in the stock market at the opening today. The rise in prices in London and Chairman Bray's statement in regard to the government's dissolution suit against the United States steel corporation resulted in a buying movement in the steel stocks.

The common stock opened with a block of 12,000 shares at \$1.75 to \$2.14 and on active buying advanced quickly to \$2.75, a gain of 34¢ from yesterday's close. The preferred stock opened 1 1/2 higher on a sale of 4,000 shares. Its gain was soon increased to 40¢.

The general market was irregular with an upward tendency the more active issues. Reading Union Pacific and Amalgamated copper all made substantial advances. Action of Lehigh Valley showed some hunchiness. Canadian Pacific was the conspicuous feature of the railroad quarter, rising buoyantly to \$24 1/2. Erie stock and bond issues were absorbed heavily by improvements of a point.

The Harriman and H. L. stocks responded substantially to moderate purchases and the whole list seemed to feel the impulse of confidence. With the speculation proceeding in normal fashion and alarm over yesterday's display in United States steel vanishing room shorts began to show uneasiness and covered freely before the close forcing the prices of many stocks between 1 and 2 points.

Wool Market.

St. Louis, Oct. 28.—Wool active. Territory and western mediums, 12 3/4 to 13¢; fine medium, 18 1/2 to 19¢; fine, 19 1/2 to 20¢.

Chicago Closing.

Chicago, Oct. 28.—Wheat—Dec.

88 1/2-89 1/2; May, 11 1/2-12.

ASTHMA CATARRH CURED

Expect Medical Scientists Announce

Startling Results Obtained by

Serpine.

New York, Oct. 28.—Thousands are

taking advantage of the generous of

for made by the Woodworth Co., 1161

Broadway, New York City, requesting

an experimental package of Serpine,

the great discovery for Asthma, Hay

Fever, Bronchitis, and Catarrh, which

is mailed free of charge to all who

write for it. It is curing thousands of

the most stubborn cases. It makes no

difference how long you have been

suffering or how severe the climatic

conditions are where you live. Serpine

will cure you.

If you have experimented with

other treatments and have failed to

find a cure do not be discouraged but

send for a trial of this wonderful truly

meritorious remedy which is a scientific

discovery made by a professor of

Vienna University, and is being

recommended by thousands.

Clairvoyant Prof. Post

will, in order to convince the public that his readings are superior to the ones you received, reduce his

\$5.00 Reading to 50c.

For This Week Only

If affections of the heart torment you if you wish to know whom to trust and whom to avoid; if you wish to know what business you are best adapted for, what to do to be more successful, how to win the love of the one of your choice; or before you undertake anything of importance you will make no mistake by consulting him.

NO MATTER WHAT YOUR TROUBLE MAY BE THERE IS POSITIVELY HELP FOR YOU.

Hours 10 a. m. to 8 p. m. daily.

Permanently located at

414 WEST GOLD AVE.

Opposite the Postoffice.
